

## Human Hippocampus Arbitrates Approach-Avoidance Conflict

Dominik R. Bach,<sup>\*</sup> Marc Guitart-Masip, Pau A. Packard, Júlia Miró, Mercè Falip, Lluís Fuentemilla, and Raymond J. Dolan

(Current Biology 24, 541–547; March 3, 2014)

As a result of a production error, the version of Table 1 originally published in this article online and in print contained several incorrect labels. For each of experiments 1–3, the originally published table erroneously included two rows labeled “Threat level: overall,” the second of which should have read “Threat level × task: overall.” These erroneous labels have now been corrected in the article online. The journal and the authors apologize for any confusion resulting from these errors.

## Resolution Mediator Chemerin15 Reprograms the Wound Microenvironment to Promote Repair and Reduce Scarring

Jenna L. Cash,<sup>\*</sup> Mark D. Bass, Jessica Campbell, Matthew Barnes, Paul Kubes, and Paul Martin<sup>\*</sup>

(Current Biology 24, 1406–1414; June 16, 2014)

Due to an oversight during the proofing stage, the version of this article originally published online contained an erroneous Figure 1 title, “Skin Wound Healing Is Accelerated with Chemerin Treatment through Direct and Indirect Mechanisms.” The title should have read “Skin Wound Healing Is Accelerated with C15 Treatment through Direct and Indirect Mechanisms.” This error has now been corrected in both the print and online versions of the article. The journal apologizes for any confusion this error may have caused.
